

Software Developer

vienpham2019@gmail.com | [Github](#) | [Blog](#) | [LinkedIn](#) | [Portfolio](#)

I am a Web Developer with a passion for learning new languages and technologies. My experience includes building strong relationships and resolving critical work challenges. Throughout my career, I have earned a reputation as a dependable colleague among my managers and peers. I am known for my strong work ethic and trustworthiness. Additionally, I excel at identifying customer needs, implementing effective business solutions, and delivering outstanding customer service.

TECHNICAL SKILLS

MySQL, RESTful API, JSON, JavaScript, ReactJS, Redux, React Hooks, HTML, CSS3+, Tailwind, Semantic UI, NodeJS, Express, MongoDB, Git, GitHub

WORK EXPERIENCE

Infosys, Phoenix, AZ

Tech Support Associate

June 2021 - Present

- Familiarity with Agile development methodologies.
- Experience with software design and development in a test-driven environment.
- Knowledge of coding languages (e.g. C++, Java, Python) and frameworks/systems (e.g. AngularJS, Git).
- Revolve around installing and repairing software and applications, troubleshooting and conducting regular tests and maintenance to ensure smooth workflow.

TECHNICAL PROJECTS

VMovie - [Github-Front-end](#) | [Github-Back-end](#) | [Demo](#)

Allows users to book movie tickets, order food and drinks, and have admin access for managing various aspects of the system.

- Utilized React/Redux for frontend.
- Implemented the backend with Node.js and Express using the MVC pattern and designed APIs to handle fetch requests.
- Designed the frontend using Tailwind.

The_Movies - [Github-Front-end](#) | [Github-Back-end](#) | [Demo](#)

Create a favorite movie list, write reviews, share movie collections.

- Utilized React/Redux for frontend and Socket.io to add/chat with friends between client-side.
- Used NodeJS and Express to design the backend with the MVC pattern and API for responding to fetch requests.
- Designed the frontend with Bootstrap and custom CSS.

Maze Generator - [Github](#) | [Demo](#)

Maze generation algorithms are automated methods for the creation of mazes.

- Utilized React and designed with custom CSS for front-end
- Deploy application to Firebase.

EDUCATION

Flatiron School, Houston, TX

Full Stack Web Development, Ruby on Rails and JavaScript immersive program

January 2020 - May 2020

Lone Star Community College, Woodland, TX

Completed coursework towards an Associate's Degree in Software Engineering

January 2016 - May 2019
